## We hold ourselves accountable

The Board of Education and the staff of Littleton Public Schools will be accountable for the process and the effectiveness of the Professional Learning Communities initiative, as it addresses the district's achievement goal. Measurable results are anticipated by the 2011-2012 school year.

A Blue Ribbon Committee, comprised of teachers, parents, principals, classified staff members and others, will be formed to monitor and evaluate this calendar approach, the results of Professional Learning Communities and student achievement work over time, and then report these findings to the Board of Education as appropriate.
